

LOOPA

is a lightweight partition made of 2 parts that grasp into each other. Both parts can be assembled by attaching the velcro straps and can be rolled for the transport or for storage (Ø25cm). Loopa used as a lamp projects shadow patterns to the wall and the ceiling.

Material:

aircraft plywood, felt

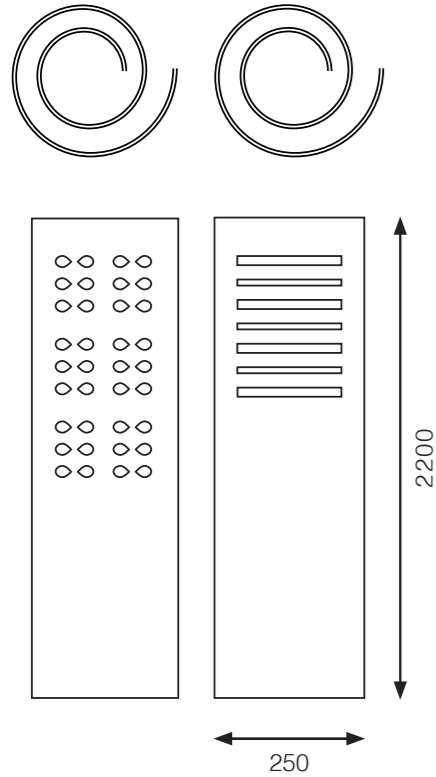

Size:

200cm (height), 120cm (width)

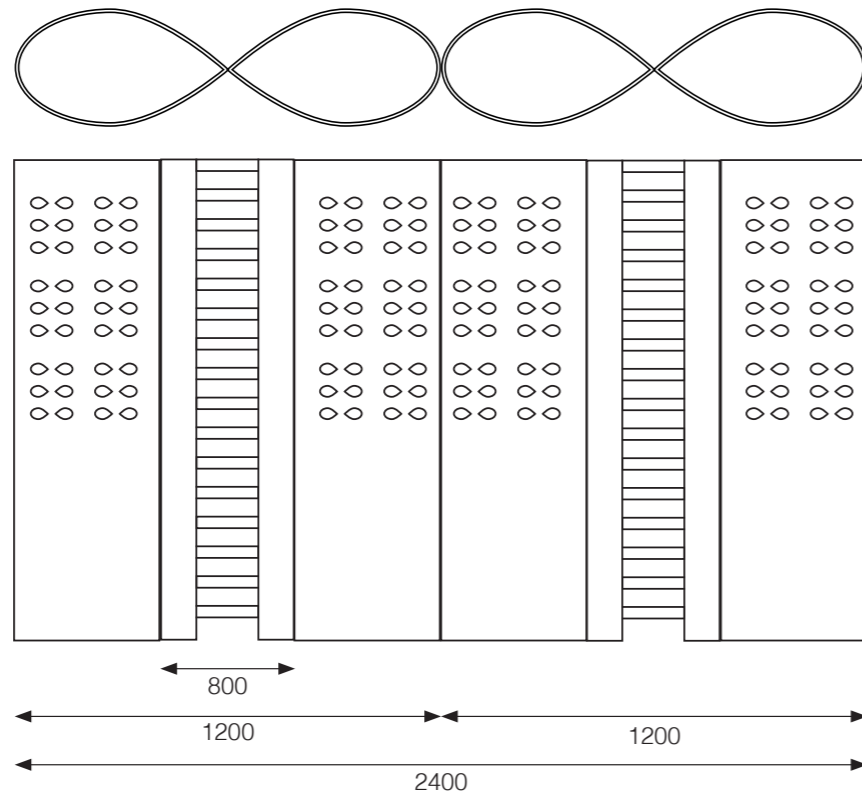

measurements of storage package:

> modules of the LOOPA are rolled up for the transport and storage

measurements of assembled modules:

> modules used as partition or lamps

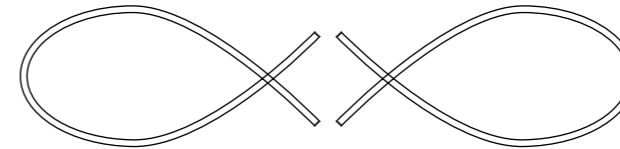

> length of one module : 1200mm

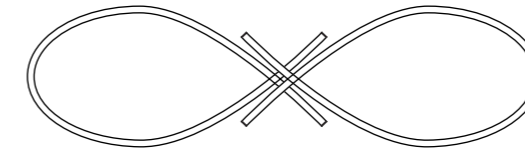

1. unroll the modules

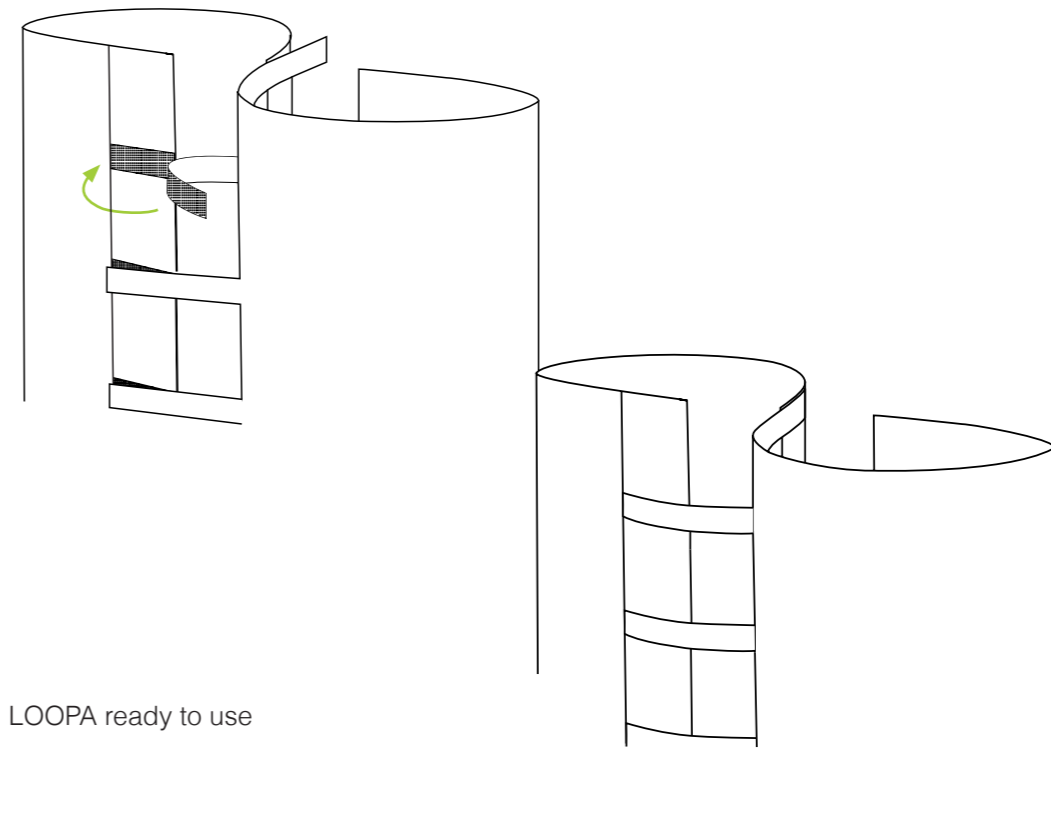

2. take both sides of a LOOPA module and put them in following position

3. move both parts closer towards each other

4. attach the velcro parts of the straps to the velcro parts on the textile surface of opposed side part

5. LOOPA ready to use
